

A Discussion on MSHA's Proposed Mobile Equipment and Powered Haulage Rule

Event

9.30.21

2:00 PM — 3:00 PM EDT

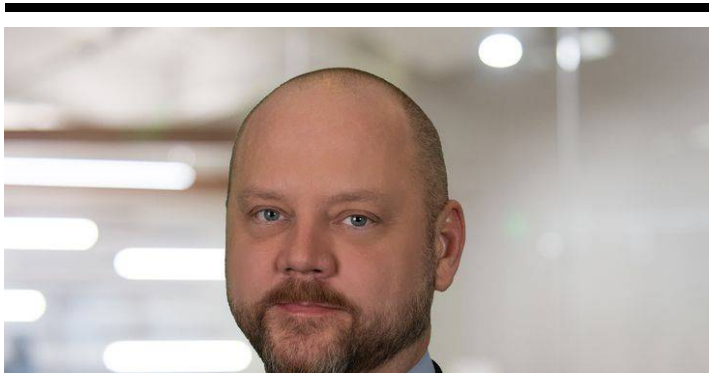

After years of anticipation, MSHA has proposed a rule on mobile and powered haulage equipment (excluding belt conveyors) at surface mines and surface areas of underground mines. MSHA is proposing that mine operators be required to develop and maintain detailed written safety plans for mobile and powered haulage equipment and appoint a “responsible person” for purposes of that plan. This proposed rule affects both the coal and metal/non-metal sectors alike. Comments in response to the proposed rule are due to MSHA by November 8, 2021 and members of the mining community are encouraged to submit comments.

Join Fisher Phillips partners Chris Peterson and Arthur Wolfson for this timely webinar to learn what employers in this industry need to know about this long-awaited development and what questions it raises. After a presentation on the proposed rule, this program will invite participants to join in a discussion so that industry members may share ideas, questions and concerns. Space is limited to allow for the discussion portion of the program.

If you have any questions, please contact [**Kathleen Alberico**](#).

*Fisher Phillips is committed to providing access to all of our events for disabled attendees. Automated closed captioning is available for all of our webinars. For other accommodation inquiries, please give us three business days advance notice prior to the scheduled event by contacting [**Kathleen Alberico**](#). Thank you.*
