

Digital Wiretapping Litigation Map

The Wiretapping Litigation Tracker provides a comprehensive view of digital privacy litigation matters filed across all fifty states. It includes all litigation filed alleging a privacy claim involving the use of digital tracking technologies, such as cookies, pixels, and beacons, embedded in websites, apps, or marketing emails. The tracker includes all matters filed since the Ninth Circuit issued its ruling in *Javier v. Assurance IQ, LLC et al.* on May 31, 2022. The tracker is searchable by state, industry, and whether matters are filed in state or federal court. This offers valuable insight into the legal activity in this area. By visualizing key metrics such as the number of matters filed and the

specific industries being impacted, this map highlights the emerging litigation trends and the current regional differences in digital privacy litigation. For clients, it serves as a critical tool to understand the progressive nature of this litigation trend.
