Fisher Phillips

AI Ethics Policy and Governance Services

Promote fairness, accountability, and trust in your AI systems

As AI continues to play a growing role in the workplace, having a well-defined ethical framework is essential to fostering trust and driving long term success. **Our comprehensive AI Ethics Policy and Governance services will help you establish a strong ethical foundation for the use of artificial intelligence – one that is not only legally compliant but also socially responsible.**

Our services include drafting customized ethics policies that address critical areas such as bias mitigation, transparency, data privacy, and accountability. We also assist in creating governance structures to oversee the implementation, monitoring, and ongoing compliance of AI systems. Drawing on frameworks like the NIST AI Risk Management Framework, we help organizations operationalize ethical principles while ensuring compliance with applicable laws and industry standards. We'll provide actionable guidance to align your AI practices with your organizational values and stakeholder expectations.
