

CPEs for CPAs Featuring Fisher Phillips Partner

Event

12.05.14

For 14 years the KSU Small Business Development Center has produced the popular “CPEs for CPAs” program.

CPAs can receive CPEs by attending a presentation by Atlanta Partner Jennifer Sandberg during the Kennesaw State University Small Business Development Center’s annual “CPEs for CPAs.”

Jennifer will cover the following topic:

A Different Kind of Audit: When Is the Last Time Your Company Conducted An Employment-Related Compliance Audit?

If it has been a while, or if you can’t even remember the last time your company (or your client’s company) reviewed employment-related practices, it’s time for a “checkup.” Changes in employment law occur not only when new laws are passed, but also as the courts interpret existing laws. Even subtle legal changes sometimes affect what should be included in a company’s policies and procedures. To remain in compliance with applicable laws, a company should set a schedule and periodically review human resources policies, practices and procedures to ensure that they are up-to-date and remain “best practice.”

This session will survey the various areas that should be covered in a “checkup” as well as address the areas where most employers have the most exposure. The session will provide practical answers that can be put into effect right away if needed. Then, you will know you are doing all you can to prevent or at least minimize the likelihood of labor and employment law problems occurring down the road.

Date and Location:

Friday, December 5, 2014

KSU Center

3333 Busbee Drive NW

Kennesaw, GA 30144
